Over 5,700 American Indian and Alaska Native women and girls were reported missing as of 2016, according to the National Crime Information Center, but only 116 of those cases were logged with the Department of Justice. Eighty-four percent of Native women experience violence in their lifetime, according to the National Institute of Justice. A 2008 study found that women in some tribal communities are 10 times more likely to be murdered than the national average.
