His book, ***The Trail of Nenaboozhoo: and Other Creation Stories***, published in December 2019, is a collection of stories of Nenaboozhoo, Ojibwe creator spirit-being, & others.

It is an artistic treasure that supports and promotes the cultural tradition of oral storytelling along with stunning art by Indigenous artists, Isaac Murdoch and Christi Belcourt.

The stories, shared in Ojibwe and English, are used as a language learning tool.

Co-Sponsored by Anishinaabe Language Revitalization Department & 7th Generation

"It is important now, just due to the fact that we have lost so much language and stories, to do what we could to preserve them. I am a strong believer that the oral history comes through songs, through dance and ceremony." Isaac Murdoch
